U.F.A. and U.F.W.A. Convention In Oyen, Thursday, July 18.

Premier Brownlee to Address Evening Session

Robert Gardiner, M.P., and Lorne Proudfoot, M.L.A., will also address Convention.

Oyen Ball Team Wins At Marengo and Monitor

Following their success at the Valley on Dominion Day, the Oyen ball team "cleaned up" at Marengo last Wednesday, winning each of three games by comfortable margins, the score by innings being:

Oyen	3	4	0	0	x	7
Alsask	0	0	0	0	3	3
Horne, p. Gosselin, c.						
Oyen	0	3	7	0	3	13
Coville	0	0	0	5	0	5
McMurray, Gosselin p. Fowler, c.						
Oyen	3	0	0	2	4	0
Hosier	0	2	0	0	0	2
Wes Horne, p. Gosselin, c.						

On Monday the ball team entertained the fans at Monitor, to a real hitting spree, which netted a total of 43 runs in three games.

In the first game Oyen defeated Naco 10-7, with McMurray and Wes Horne pitching, Gosselin catching.

In the second game the hitting was even more terrific and Monitor had to be content with 2 runs while Oyen collected 19. L. Stull and Gosselin pitching and Gosselin and Fowler catching.

In the final game with Gosselin the first five innings were played without a score, but in the sixth and seventh, Oyen landed on the Gosselin pitcher and collected 4 runs in each and held their opponents scoreless. The game finished in Oyen's favor an 8-0 shut out. L. Stull, p. Gosselin, c.

The players attending were Horne, Pears, Phillips, Gosselin, L. Stull, C. Stull, McMurray, Fowler, Green, A. Wright and F. Robinson.

An unfortunate accident occurred in the third game when Bob Green was struck by a pitched ball and had his jaw bone fractured.

Alberta Exhibits for American Fairs This Season

Alberta will again be advertised this season by an exhibit of agricultural products and natural resources to be shown at a number of state and county fairs through the middle western States. Arrangements have been completed by the Publicity Branch of the Department of Agriculture to show this display at fairs in Minnesota, Iowa, Nebraska and Kansas during August and September. A marked increase in the interest shown in the opportunities for settlement in Alberta and in emigration to the province is reported from the localities in which similar exhibits have been shown during the past few years.

CARD OF THANKS

Mr. and Mrs. L. J. Wood wish to express their sincere thanks for the many kind and practical expressions of sympathy tendered by friends, following the loss of their home by fire on June 30.

Thursday, July 18, will be a busy day in Oyen. Delegates from the U.F.A. and U.F.W.A. Locals in the Acadia Provincial Constituency, meet here for their annual convention, which will open in Oyen Theatre at 10 a.m. The time of the afternoon and evening sessions will be announced from the platform.

Hon. J. E. Brownlee, Premier of Alberta, will pay his first visit to Oyen, and address the evening session. Robert Gardiner, M.P., and Lorne Proudfoot, M.L.A., will also address the convention.

The public is cordially invited to attend the sessions.

Fire Loss Heavy In Alberta

Alberta stood highest among the provinces of Canada with a per capita loss of \$5.71 caused by fires during the year 1928 according to figures compiled by the Dominion Fire Commission. The total fire loss in the Dominion during the year is given as \$102,607,849.

O.S.A. Reunion at Olds

The Summer Reunion of the O.S.A. Alumni Association is to be held at the Olds School of Agriculture on Thursday and Friday, July 18 and 19. The Summer Reunion is one of the many pleasant and enjoyable occasions that take place at the O.S.A. each year.

The programme for the forthcoming Reunion includes the unveiling of the Honor Roll bearing the names of ninety some O.S.A. graduates who served in the World War. This function is to take place on the first day of the Reunion at 2:30 p.m. The other items on the programme will include picnic supper on the lawn during both evenings, playing off of games, business meeting of the Alumni Association and a survey of the experimental plots and the inspection of the plots and flowers.

The Alumni members and their friends are all, invited to attend on one or both of the days of the Reunion. It is felt that the time and the money spent in taking in this function will be well worthwhile.

Annual Summer Fair

Preparations to make the fifteenth annual summer fair the best yet, are practically completed. Prizes in the stampede events have been increased, and this part of the programme is expected to prove even a greater drawing card than that of last year. Other entertainment features will be horse racing and baseball.

The buildings, grounds and track will all be gone over and put in shape for the day. Keen competition in all classes of exhibits is anticipated.

Died—At her home near Cappan, on July 10, Mrs. H. J. Ball. The funeral will be held at Cappan to-morrow.

Firestone TIRES

The One Hundred Percent

Lady Astor, the Bernard Shaw, has the habit of saying startling things that make people think. Says the Winnipeg Tribune: In the recent election campaign in Great Britain she struck a responsive chord in many minds when she said:

"It is the 100 per cent. American and the out-and-out Englishman I fear. I think 100 per cent. citizens ought to be locked up. They are a danger to the world."

Everybody knows what a 100 percent, or an out-and-out, is. He is to be found in more or less conspicuous numbers in every country, although his favorite stamping ground is the North American continent. The 100 percent may be distinguished by several well-known characteristics.

In the first place, he holds as a great moral principle the "immoral doctrine" embodied by the famous motto, "May my country be always right, but my country right or wrong." This naturally scales down into "my state (or province), my city, my ward, my party" and, not infrequently, "myself."

In essence it places a nation, or a locality, or a group of persons associated together for some common cause, above every ethical or moral judgment of mankind, above the sense of right or wrong.

Another sign of the 100 percent is a steadfast belief that everything that is American, or Canadian, or English, or Italian, is right, because it is American, or Canadian, or English, or Italian. The logical consequences of such an obsession is that he cheapens his country's flag by dragging it in and flouting it on every possible occasion.

The 100 percent is not all bad, of course. He merely fails to see that patriotism is not the cause but the result of a sound and honorable national life. He is the victim of current standardization of thought which manifests itself in slogans and headlines. Not everyone would want to go as far as Lady Astor and have him locked up. Nevertheless, he is a danger because his enthusiasm is rooted mainly in a mass of intolerances. And intolerance, as Lady Astor implied, is one great obstacle to civilized social progress.

And in civilized social progress lies the hope for the future peace of the world. If the American, the Canadian, the Englishman, the Italian find upon the acceptance of their particular national views, and intolerant refusal to see any good or virtue in the views of others, what hope can there be of the nations drawing closer together?

And if the 100 per cent. doctrine is sound and right, and the 100 percent is to have his way, what hope is there for the future of many nations of today? Take Canada as an example. If the 100 per cent. Easterner adheres rigidly to his views, declares he alone is right, but whether right or wrong, he will not budge from his position, he has taken on fiscal or other questions, and the 100 per cent. Westerner adopts the same attitude, what will be the outcome of the Canadian Confederation?

Apply the same attitude of mind in matters of race, language, religion, and government, in Canada and in the rest of the world, and you have an impossibility. The 100 percent would wreck everything if he does not have his own way.

All history proves that intolerance has been the cause of the world's greatest sorrows, the underlying cause of its bloodiest wars, intolerance of race, intolerance of national customs, intolerance of religion, intolerance of social conditions, the 100 percent in the ranks of employers and in trade unions, these are the real dangers in the world today as they were in the years that are past.

The 100 per cent. demagogue with a glib tongue and a reckless disregard for truth and fact by attracting the attention, playing upon the passions, prejudice, and intolerance of the masses, and in the end, guided by their intelligence, can undo the work of generations of statesmen and render difficult and almost impossible the work of the true reformer.

The man who boasts he is 100 per cent, this 100 per cent. that is merely advertising the fact that he is intolerant in his views and narrow in his vision and conception of life. He may be sincere, but his sincerity is the outcome of his intolerance, and his intolerance has its foundation in ignorance and a prejudiced mind. As such he is a national danger.

To Test Air Television

Monoplane Has Been Especially Constructed To Try Out Invention

Fight tests will soon be made of television apparatus calculated by its inventor, C. Francis Jenkins, Washington physicist, to reproduce conditions as seen from an airplane, on a screen miles away.

Moving panoramas of countryside—in wartime instantaneous recording at headquarters of observations made by planes back of the enemy lines—so broadcast by the "aerial television eye," will soon be a scientific reality, he said.

Will Increase Empire's Trade

U.S. Tariff Likely To Divert Trade To British Dominions

Increased United States tariff against Canadian products will divert Canada's trade more and more to the other Dominions of the British Empire, believes Norton Francis, president of the Canterbury, New Zealand, chamber of commerce, and prominent business man, who is visiting Canada and the United States for the purpose of studying relations between the farmer and city industry on this continent.

In an interview at Winnipeg, Mr. Francis said he does not think Canada can meet the tariff situation by further raising her own tariff scale, but should concentrate on increasing her manufacturing and inter-empire trade.

The moisture evaporated from a single white oak in a day has been estimated to be 150 gallons of water.

Can Measure Laughter

Machine Determines Whether Comedy Piece Is Successful Or Failure

"John James, comedian, Lafo-graph 80," may be the form of card used by entertainers in the future, for a new apparatus has been invented to register the exact "strength" of the laughter aroused by a comic piece in a theatre or concert hall. It registers the truth and nothing but the truth. The machine will presumably have a figure to denote absolute efficiency, and should a musician come up to come up to scratch it will not longer be possible to suspect that the fall-out will be to the critics. The critic's work will be made easier, or, discussing a comedian's qualities, it will be necessary only to say at the end: "Lafo-graph 100, or 50, or 0," as the case may be. After a first night the public will be able to see the registered rise and fall of the needle—how it began at "chuck," rose to the middle spheres of "dither," and "laugh," leapt to the higher "outburst" or "scream," or reached the supreme heights of "screch."

PAINS IN THE BACK

These Are Usually Due To A Weakened Condition Of The Blood

The muscles of the back are constantly under heavy strain, and have but little rest throughout the day. They are therefore in need of nourishment and strength that plenty of pure red blood can give them. If they have this help, you will have backache and continue to have it.

Backache seldom or never means kidney trouble. It is more often caused by the tired, worn-out muscles of the back showing their exhaustion because of the lack of good, pure blood. The one generally recognized cause of this is poor circulation.

Dr. Williams' Pink Pills for Pale People. When the blood has been improved through the use of this medicine, backache disappears. Mrs. F. Fairbank, Essex, Ont., tells what Dr. Williams' Pink Pills did for her in a case of this kind.

She says: "I suffered for nearly three years with backache. It was so bad that I could not do my work. I had to stand straight without suffering intense pain. After using two boxes there was no more backache. And helping me, I used eight boxes in all and have not since had a sign of the trouble. I can do all my work and do not feel tired and worn out."

Dr. Williams' Pink Pills. Your dealer does not keep these pills you can get them by mail at 10¢ a box from Dr. Williams' Medicine Co., Brockville, Ont.

Free Advertising

The effort of Gollomon and O'Gullivan had plots for sale in a suburb. O'Gullivan—young, enthusiastic, was writing the advertisement. He urged impending purchasers to seize the passing moment.

"Bargains," he wrote, "not only met opportunity; he created it!" Mr. Gollomon read this line in the advertisement slowly and carefully.

"This fellow Napoleon is reading 'what's the use of advertising him with our money'."

Powerful Medicine. "The healing properties in six essential oils are found in every bottle of Dr. Thomas' Electric Oil, forming one of the most beneficial liniments ever offered to the use of man. Many can testify as to its power in allaying pain, and many more can certify that they owe their health to it. Its wonderful power is not expressed by the small price at which it sells."

Agricultural Machinery Sales. Agricultural machinery sales in Saskatchewan, which approximate \$50,000,000 annually, are increasing each year, owing to the volume of wheat and other grains produced, according to a departmental report.

Her Little Boy Was Very Ill With Summer Complaint

Mrs. Ray Fisher, Lehart, Sask., writes: "For over a month, last summer, my little boy was suffering from summer complaint. He got so bad there began to be traces of blood in his stool, and everything he ate would not stay on his stomach very long. He became so weak he could hardly get up. A neighbor recommended

"Discouraged and in despair, I sent for a bottle not expecting any more benefit than from the many other medicines I had tried, but to my surprise I noticed a change after he had taken a few doses, and before the bottle was half used he was the same happy, healthy boy he was before he took sick."

Important Move Made By Labor Government

Would Have Dominion Agree On Signing of Optional Clause Of World Court Statutes

Important negotiations affecting Empire affairs, are reported to have been initiated by the Dominion Government of Great Britain. It has communicated with all the Dominions in an effort to gain agreement on the signing of the optional clause of the world court statutes, under which questions of international law would be submitted to the permanent court of international justice, at the Hague.

The Labor newspaper, the Daily Herald, said also that the Labor Government has informed the Dominion governments that it proposes to resume diplomatic relations with Russia.

The world court matter requires agreement of all the Dominions, and it is expected this can be secured without much trouble. The Dominion, however, was probably the only Dominion reluctant to sign the optional clause, and it is understood that a reluctance has now been removed to a great extent. In any event, Premier Ramsay MacDonald is hopeful of being able to show complete Empire agreement on joining the world court when he visits the League Assembly, at Geneva, in September.

So far as Russia is concerned, the Labor Government is already pledged to renewal of diplomatic negotiations, this being a necessary and important step towards the desired increase in British trade with the Soviet Union.

Search For Oil In Manitoba

Western Oil Fields Are Gradually Extending Eastward

The search for oil in the western provinces is gradually extending into Manitoba, and an announcement is made of the formation of a syndicate of eastern capitalists to drill in the Ochre River field. The syndicate, which is called the Carter Oil Syndicate, has taken over the holdings of 1,500 acres south of Ochre River.

Minard's Liniment For Eczema.

Official Criticism

The Movie Manager—Good morning, m'am. I asked you to call because I wanted your opinion on some of my features.

The New Censor—Well, to begin with, your forehead is too low, your eyes are not mazel, your nose is too big and bulbous, your mouth is too large and fatty, and you're little or no chin. Otherwise they will do very well. Is that all?

Drives Asthma Like Magic. The instant help from Dr. J. D. Kellogg's Asthma Remedy seems like magic. Nevertheless, Dr. Kellogg's remedy used in a natural way. The smoke or vapor, reaching the most remote passages of the affected tubes, brushes aside the trouble and opens a way for fresh air to enter. It is sold by dealers throughout the land.

Large Purchase Of Sheep. The first 10,000 sheep for the Manitoba Woolmark Creamery have been purchased. These consist of 7,000 Rambouillet and 3,000 Oxford crosses. Representative buyers are being established at the larger country points in the province.

No man or woman should hobble painfully about because of corns when so certain a relief is at hand as Holloway's Corn Remedy.

Oldest Wine In World. The oldest wine in the world is on exhibition at Speyer, Germany. It is Roman wine, recently dug up, and is estimated to be 1,600 years old. It is rarely sold, for Romans put honey in their wine.

Keep Minard's Liniment in the Medicine Chest.

Famous Detective Retires

Scotland Yard Officer Was Successful In Solving Many Celebrated Cases

Retirement of Frederick Wensley, as chief of the intelligence division of Scotland Yard, has brought to an end a career which began in the Limehouse district and resulted in the solution of numerous murder and other mysteries. He came to know every nook in Chinatown and the East End, the anarchist's haunts and the slums of the East. His features, piercing eyes and bushy eyebrows, Wensley resembles Lord Reading, and really looks the part that novelists have assigned the detective. In real life his work often shamed the amateur exploits of his prototypes in fiction. Most of his murder mysteries were solved as he sat back in a big armchair in Scotland Yard Building. He would sit for hours staring at the river while studying every angle of the case, and when he left that chair, things began to happen.

Back in 1888, Wensley took part in the famous Whitechapel hunt for "Jack the Ripper," who murdered many young girls. He showed his keen eye for detail when he was in the Sydney Street sleep when a group of murderers barricaded themselves in a house and fought a battalion of Royal Canadian Mounted Police.

One of his most famous exploits was the case of the mystery house when he found that Malley, the tailor, had been living for weeks behind barricaded doors, alone with the bodies of the women he had killed.

One of his most astute solutions was in the murder of Madame Gerald, which he solved with only two clues to work on, a laundry mark and a piece of paper with the cryptic words "blonde Belgium."

Most of his cases were sordid murders which were not sensational, but which required much skill to solve.

Excellent For Croupy Children. When a child is suffering with croup it is a good plan to use Dr. Thomas' Electric Oil. It reduces the inflammation and loosens the phlegm giving speedy relief to the little sufferer. It is equally reliable for sore throat, chest, earache, rheumatism, cuts, bruises and sprains. Dr. Thomas' Electric Oil is regarded by many thousands as an indispensable of the family medicine chest.

Britain's Oldest House. The oldest inhabited residence in the kingdom is said to be Dunvegan Castle, in the Isle of Skye. Part of it dates from the ninth century, a couple of hundred years before the conquest of England by William the Norman.

The cheapness of Mother Graves' Worm Exterminator puts it within reach of the poor, and it can be got at any drugist's.

Could Qualify. "I won't disguise the fact that this job is a tough proposition. The man who gets it will have some ugly customers to deal with."

"Then it will suit me down to the ground. I've had some of experience with such a way for fresh air to enter."

"Where?"

"In a beauty shop."

It May Be Urgent

When your Children Cry for It

Castoria is a comfort when baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done. For Castoria is a baby remedy, meant for babies. Perfectly safe to give the youngest infant; you have the doctor's word for it. It is a vegetable product and you could use it every day. But it's in an emergency that Castoria means most. Some night when constipation must be relieved—or colic pains—other suffering. Never be without it; some mothers keep an extra bottle, unopened, to make sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

Castoria

Took Air Trip Alone

English Farmer, Sixty-Seven, Flees To Holland and Back

Richardson, 67, Britain's so-called oldest farmer, made a lone flight from Norwich to Rotterdam, Holland, and back.

He scorned the dissuading pleas of his fellow farmers, saying: "Don't talk to me about nerves! It doesn't take much courage to fly over the sea."

LEVEL CROSSING ELIMINATION IS BEING PLANNED

Ottawa.—The Board of Railway Commissioners, the road departments of the Provincial governments throughout Canada and the railways of Canada are making a joint survey of the level crossings situation with a view to a definite and comprehensive program of level crossing elimination.

The provincial officials are now engaged in classifying the crossings from the point of view of the degree of danger and the nature of the protection needed. When this has been done, the board, the provinces and the railways will confer and decide where the greatest urgencies lie. The most dangerous crossings will be eliminated or protected first.

The program to be carried out will require from half a million to a million dollars a year from federal government, which means an expenditure of two per cent of the gross annually. The grade crossing fund which has been replenished at the rate of \$200,000 a year for many years is proving insufficient since the campaign of the last few years inaugurated by the Hon. Charles Dunning, minister of railways. At present it is down to about \$120,000 and Mr. Dunning will probably ask Parliament next session to increase the \$200,000 to the larger amount. Under the provisions of the federal government the fund, which is administered by the railways, will pay up to 40 per cent of the cost of any crossing elimination and protection.

Father Sought By Radio

Message Sent To Police Officer In Far North To Advise Him Of Son's Illness

Ottawa.—A sick child in a hospital here is waiting reply from his father at the lonely Royal Canadian Mounted Police post at Chesterfield Inlet, on Hudson Bay, to a message broadcast over the Canadian National Railways Radio chain.

The message was to advise Staff Sergeant M. A. Joyce, that his 14-year-old son, Scott, is seriously ill here, and asking him to get in touch with Ottawa by radio if he can get to a wireless station.

World's Population

Believe Population Will Be Doubled In Next 150 Years

Chicago, Ill.—Mankind probably will require at least 150 years to double the world's present estimated population, which is between 1,700,000,000 and 1,800,000,000, it fertility and mortality remain as at present. A mere doubling of the world's population however, will produce a striking change in the world's economic and social conditions, and a greatly increased percentage of Slavs. The population of North America, Western and Northern Europe and Australia even now are no longer reproducing themselves.

Tourists Play Safe

Windsor, Ont.—"Don't shoot; I have no booze in this car." Banners bearing this inscription were pasted on the windshields and rear windows of automobiles reaching here from Chicago and other Illinois centers. It evidently constitutes a novel manner of protesting against the alleged promiscuous shooting of "bootleg" suspects by American state police.

Rumor Is Denied

Ottawa.—A rumor that Canada has made an offer to the Newfoundland government for the purchase of Labrador was given official denial here. "In no way is it true," said Premier King, when the matter was drawn to his attention. The rumor indicated that the price offered by the Dominion government was one hundred million dollars.

Hon. Heenan Will Go To Edmonton

Edmonton.—Hon. Peter Heenan, federal minister of labor, will be in Edmonton shortly to sign in behalf of the Dominion government the necessary documents and agreements in connection with the old age pensions scheme, about to go into operation under the joint auspices of the two governments.

Non-Party Delegation

London, England.—With the decision to send a non-party delegation to the League of Nations assembly in September, it became known that Viscount Cecil would probably be one of the delegates.

W. N. A. 1793

State Control Of Radio

Royal Radio Commission Makes Important Recommendations

Ottawa.—Government control of all broadcasting stations, elimination of advertising from the programs and that licensees in pay the upkeep by the Dominion Government before the Royal Radio Commission at the final session here by the All-Canada Congress of Labor and the Canadian Legion of the British Empire Service League.

The Canadian Congress representatives also recommended that the present commission be continued or a similar organization be established vested with complete administrative control of radio broadcasting.

The Canadian Legion advocated a broadcasting organization that would develop Imperial patriotic and Canadian culture. Canadians said the Legion briefly were being overruled with foreign program charged with propaganda.

The commission will at once begin the preparation of its report. It will be available about the end of the month.

Canada May Consider Relations With Russia

Communications From British Government Have Been Received

Ottawa.—Certain communications of a "general and preliminary nature," regarding the signing of the optional clause on the League of Nations, and the assumption of diplomatic relations with Russia, have been received by the government of Canada from the British government, that was the content of the information given out here with respect to these matters which are under specific motion in the House of Commons. King's speech at the opening of the parliament.

Just what position the Canadian government is taking on the question of resuming diplomatic relations with Russia has not been stated. It is considered, however, that Canada will support any such move.

Two Injured In Explosion

Faulty Water Jacket Burst In Jewell Shipyard, Winnipeg

Winnipeg.—A violent explosion, which shook buildings within a half a block radius, caused injury to two men and the destruction of the basement of the Jewish Orphanage, on Matthews Avenue, north Winnipeg.

Many children are cared for at the orphanage, but all escaped injury. One of the city water works employees was attempting to repair a faulty water jacket in the basement of the orphanage. The employee, George Bennett, was painfully hurt, while Mrs. A. Gowsky, wife of the orphanage superintendent, suffered from a fractured arm and leg.

It was first reported that fire had followed the explosion, but this was erroneous, though firemen from central and north stations were called out and aided in bringing the injured man to the building.

To Cross Atlantic In Small Vessel

Five Cleveland Men Believe They Can Make Return Trip

Cleveland, Ohio.—The little power boat Karl, manned by five men who built it, put out from here on an adventurous attempt to cross the Atlantic ocean.

The Karl, captained by Joe Lepich, 31, a German German War veteran, took on 500 gallons of gasoline and enough canned goods and water to last three months. Captain Lepich intends to skipper her down the St. Lawrence river and then across the sea to Hamburg, Germany. "We will be in Hamburg in a week," he said. The Karl will make the trip there and back," said the captain.

New Chancellor Of Queen's

Kington, Ont.—James Armstrong Richardson, of Winnipeg, head of the firm of James Richardson and Sons was chosen as the new chancellor of Queen's University to succeed Sir Robert L. Borden. Richardson was a general weeks ago. Mr. Richardson's name was the only one to be placed in nomination and he was unanimously chosen for the post.

May Spend Winter In Africa

London, England.—The Evening News says it understands the King is considering proposals to spend part of next winter in one of the "Princes North" in Africa, about which confidential inquiries already have been made, is considered the most suitable.

CROP CONDITIONS ARE VARIABLE REPORT REVEALS

Ottawa.—The telegraphic crop report issued by the Dominion bureau of statistics showed a wide range of conditions across the country. Crop prospects continue satisfactory over southern and northern Alberta. Warm weather with plenty of rain is needed in Saskatchewan and Manitoba. Fall wheat is excellent in Ontario. Scarcity of rain also is reported from Nova Scotia. The largest strawberry crop is expected in the history of British Columbia. Favorable reports are to hand from New Brunswick and Prince Edward Island.

Reports by provinces for the end of June:

Manitoba.—Manitoba department of agriculture.

Crops started late on account of cool spring. Light rains but fell left little soil moisture this spring. Germination fair. Slight setback to new fields by frost on September 12. Soil scattered and variable. Need heavy general rain over province. Prospects fair.

Saskatchewan.—Saskatchewan department of agriculture.

Growth was retarded in June by cool weather and lack of moisture and crops are generally behind the average. Although moisture conditions were improved toward the end of the month by rain, warm weather with plenty of rain, especially in the southern districts will be needed in July. In the Swift Current district wheat is weak while that in the south. Moisture supply varies widely. Will need good rains during next three weeks to make even fair crop.

Alberta.—Alberta department of agriculture.

Crop prospects continue satisfactory over southern and northern sections of Alberta. Field growth reduced over central area but conditions of coarse grains and feed improved by rains during past week. Fall wheat very satisfactory in south. Good crop alfalfa ready for first cutting. Livestock condition good. Pasture conditions increasing with improved pastures.

Sugar-beet crop generally good.

British Columbia.—Canada

Weather during June has been good with frequent showers which have generally benefited all crops. Grain crops making rapid growth and appear to be healthy and strong. Haymaking is general, but due to the cold backward spring the prospects are that the crop will be light. Root crops and vegetables are in splendid condition and making good growth. Possibly the largest strawberry crop in the history of the province is being harvested, but prices are lower than last year. Raspberries and loganberries will yield approximately the same as last year. The yield of apples and other tree fruits will be about 25 per cent less than last year.

Ontario.—The Ontario

British Columbia minister, Canada several addresses in West.

Ottawa.—Places at which Hon. Herbert Markie, Canadian minister, designated to Japan, will appear on his trip west from Montreal on July 14 have been announced here.

On his way to British Columbia, Mr. Markie will call at Toronto, Ottawa, Hamilton and Port William, Winnipeg, Regina, Calgary and Jasper Park. In British Columbia where he will spend most of his time, he will make a tour of the province, calling on August 29, he will speak at Vernon, Nanaimo, Duncan, Port Alberni, Penticton, Kamloops, Lethbridge, Kimberley, Williams, Kelowna, Sicamous and Victoria.

PARLIAMENTARY SECRETARY

Miss Susan Lawrence has been selected as parliamentary secretary to the British minister of health by Premier Ramsay MacDonald, according to the list of appointments to the junior cabinet posts.

Gold Rush Started

Report Of Strike In Northern Saskatchewan Causes Excitement

Big River, Sask.—The placer gold and platinum strike about 300 miles north of Big River is causing considerable excitement at this point. About 100 men have left here, and over 400 from other points have gone to the scene of the new find. A number of parties are now outfitting at this point and will leave by barge and canoe this week.

The principal find is reported at Prosser Lake. An old prospector who just arrived here from the scene of the strike to secure supplies reported that when he left over 500 claims had been staked around Prosser and Birch Lakes.

The route to the new placer field is by water, the entire distance being without portage, via Big River, Isle La Crosse, Lake Deep River, Clear Lake, and the new find. The reports are coming in as to the richness of the new finds, one report stating that \$17 was washed from one shovel of dirt.

Envoy To Japan

Hon. Herbert Markie Will Deliver Several Addresses In West

Ottawa.—Places at which Hon. Herbert Markie, Canadian minister, designated to Japan, will appear on his trip west from Montreal on July 14 have been announced here.

On his way to British Columbia, Mr. Markie will call at Toronto, Ottawa, Hamilton and Port William, Winnipeg, Regina, Calgary and Jasper Park. Discovers Liquor Cache

Aeroplane Flows Up 20 Barrels Of Rum With Tail Shield

Sydney, N.S.—Flying up 20 barrels of rum with the tail shield of his plane was the unique experience of Major-General J. H. MacBrien, when he found a cache of rum hidden in a forced landing on a farm near here.

The cache was nearly hidden under sticks covered with soil, and had the moth dropped a wheel into the pit instead of neatly straddling it, the results might have been serious for the man and his guest, Dr. Freeman O'Neil.

Prince Sails For Home

Prime Minister Given Enthusiastic Send-Off At Quebec

Quebec, Que.—Prime Minister, Duke of Gloucester, concluded a month's visit to Canada, when he sailed from this port on the "Empress of Australia" bound for England. A flag draped ship and the presence of the Governor-General, Lord Willington, and Lady Willington on the dock heralded the Prime Minister's departure.

The Prime Minister's departure was a notable event, as the Prime Minister turned out in large numbers and gave the King's fourth son an enthusiastic send-off.

PLAN TO SOLVE LABOR PROBLEMS IN GREAT BRITAIN

London, England.—In debate on the address in reply to the Speech from the Throne, Right Hon. J. H. Thomas, Lord Privy Seal and minister of employment in parliament outlined the government's plan for reducing the volume of unemployment in Great Britain.

Schemes must not be considered as a mere means to giving work, but also from the standpoint of stimulating trade at home, and abroad, he declared. "What we import we should make for ourselves," he asserted amid cheers from the opposition benches.

Mr. Thomas continued that the railways intended wooden track sleepers when examination had shown that only technical difficulties prevented them from using steel sleepers which could be made in Britain.

VISCOUNT CECIL ON DELEGATION TO GENEVA

London, England.—Cheers from the Labor benches greeted the announcement in the House of Commons of the appointment of Viscount Cecil again to represent Great Britain at the Preparatory Disarmament Committee of the League of Nations and to attend the forthcoming assembly of the league.

The league assembly delegation also will include the following: Right Hon. Ramsay MacDonald, prime minister.

Right Hon. Arthur Henderson, secretary for foreign affairs.

Right Hon. Wm. Graham, president of the B.B.C. of Trade.

Mrs. M. A. Hamilton, Labor M.P., Blackburn.

Helen Maria Swanswick, speaker, lecturer was the only woman member of the delegation.

Viscount Cecil, who was under-secretary of state for foreign affairs and minister of blockade in the wartime coalition government, and later became Lord Privy Seal in the Baldwin Conservative government in 1922 and 1924, has had considerable experience at Geneva as a British spokesman. He resigned from the disarmament delegation of the British government shortly after the collapse of the tri-partite naval conference at Geneva in 1927.

Right Hon. Ramsay MacDonald, prime minister, has had considerable experience at Geneva as a British spokesman. He resigned from the disarmament delegation of the British government shortly after the collapse of the tri-partite naval conference at Geneva in 1927.

On Vacation Bent

A Little Advice To Those Who Would Secure The Utmost Benefits From A Holiday

Brumettes can better than blunders. In fact, some blunders can't acquire a coat of tan at all—a and blow for many, since a tanned complexion has become so fashionable that drug stores now sell it in bottles.

According to a special "holiday bulletin" issued by the Canadian Social Hygiene Council, in co-operation with the Department of Public Health of Toronto, there are a number of "don'ts" and "dos" which the holidaying city or town-dweller should observe, if his constitution is to stand the strain of the summer rest-period.

Don't neglect mosquito bites, don't pick poison by, watch your milk and water supplies and get plenty of sun, but not too much at once, are some of the admonitions. In case of an emergency medical kit that every one is advised to pack in the suitcase.

- 3 or 4 bandages, 2 or 3 inches wide.
- 1 pound of sterilized gauze.
- 1 ounce of absorbent cotton.
- 1 or 2 ounces of tincture of iodine.
- 1 small roll of adhesive plaster about 1 inch wide.
- 1 ounce of boracic acid.
- 1 or 2 ounces of bicarbonate of soda.
- A hot water bottle.
- 2 ounces of aromatic spirits of ammonia.

"The last item is important in the event of a collapse," the bulletin advises. "From one-half to a teaspoonful of aromatic spirits of ammonia in a wine-glass of water acts more promptly than whiskey or brandy. It is one of the things we have." Cuts or bruises should be washed with soap and water and carefully cauterized with tincture of iodine. Splinters should be removed with a needle sterilized by being held for a few minutes in boiling water and the injured part treated with iodine. Poison by irritation should be treated with the juice of the jewel weed, a plant growing two to four feet high, in marshy places and possessing a juicy, semi-transparent stem, with orange-colored flowers with brown spots. Either strong laundry soap, or fresh lime-water is a good substitute.

Avoid being overly zealous in your efforts to get sunburned. Half-an-hour at a time is quite as long as any part of the body, not accustomed to the exposure, should be subjected to the strong rays of the sun, for the first few days, then it will be quite safe to increase the time to an hour, and after a fairly good coat of tan has been developed you are well protected against the dangers of sunburn. If you do not take these precautions your holiday may be spoiled—painfully.

Furthermore, recent revelations as regards the therapeutic value of the chemical rays of the sun have been such as to make one feel that the benefits of the rays of the sun that you would get by exposing yourself directly to them.

It is well to bear in mind that in order to get the therapeutic benefits it is not absolutely necessary that you be exposed to the direct rays of the sun—there is the sky shine, or reflected rays from the sky and clouds. On a clear day you may lie on or on the shady side of the house, with the blue dome above you, and get from one-third to one-half of the benefits of the rays of the sun that you would get by exposing yourself directly to them.

For mosquitoes, three things should be remembered: netting, liquid ammonia, and cool oil. The netting shuts them out, the liquid ammonia, applied promptly to a bite, frequently neutralizes the poison and prevents subsequent itching, and the cool oil, put in very

"That wretched boy has been putting mosquitoes in my trumpet again!"—Das illustrierte Blatt, Frankfurt.

W. N. U. 1792

small quantities on top of the water in rain-barrels, little ponds, etc., prevents the mosquito larvae from developing into mosquitoes. There are certain aromatic preparations such as sprays of camphor, menthol, and oil of citronella, may be applied to exposed parts of the body to keep these pests away.

But that your food be protected from the filthy, disease-spreading house-fly.

And do not be on the go all the time during the holiday. Take some rest, and sleep in the shade of the middle of the day, particularly in the shade of the trees, in your hammock, or in an easy chair, or lying on a rug on the lawn. Do not dance every night during your holiday and expect to come home rested and refreshed for the balance of the year.

A Root Disease Of Wheat

"Take-All" Does Considerable Damage To Cereal Crops

The disease called "Take-All" does considerable damage to cereal crops, particularly wheat. It also affects barley, and to a slight degree, according to Mr. H. T. Gussow, the Dominion Botanist, in Circular No. 17, of the Department of Agriculture, at Ottawa, the disease at times appears in rather large patches. Young seedlings are frequently affected with it, and the most characteristic symptoms are seen as the plants reach the heading stage. They are distinctly shorter than normal plants, and have a bleached appearance. The lower leaves are brownish and otherwise discoloured. The straw becomes brittle and worthless hereafter. When a wheat crop is severely attacked it is recommended to remove the year plants and have a second crop not subject to serious infection, and to summer-fallow the field before again sowing wheat. If the disease is not so severe, it is advised not to sow wheat as a first crop following western dry grass or bromus grass. In working out a rotation in areas where "take-all" is prevalent, it should be remembered that flax, sweet clover, corn, sunflower, and potatoes are not attacked by this disease.

Prairie Forest and Timber Limits

One Quarter Of The Forest Reserves Of Canada Are In Prairie Provinces

So famous are the prairie provinces of Manitoba, Saskatchewan and Alberta—for their production of many millions of bushels of wheat, oats, barley, rye, and other farm crops, that comparatively little is known of their other resources. Among the great assets of the prairie provinces are the national forests and timber limits, which contain approximately a quarter of the forest resources of the Dominion, and include one-third of Canada's pulpwood supplies. Saw-material, ties, cordwood, post, poles, and so on are all represented. Eighty-seven lumber mills are in operation, the output of which has an annual gross value of over five million dollars. A recent development of the forest resources on lands owned by the Canadian Federal Government has been the establishment of a pulp and paper mill in Manitoba, employing 400 people all full time.

Heads Usually Win

Centre Of Gravity Of Coin Rather Than Head Side

Why is it, asks a writer in Answers, that, when a coin is tossed, say, at the start of a match, the general tendency of the man who has the call is to say "Heads"? Even those who always "make it heads" would be amazed to say "But there is a scientific basis for the belief that a coin is more likely to come up heads than tails. An experiment carried out some years ago with four pennies, which were tossed a total of 3,600 times, showed that heads outnumbered tails. In tossing a penny 100 times, the result worked out, on an average, 51 heads to 49 tails. An interesting point, which probably has some effect on the result of a toss, is that the centre of gravity of a penny is rather the head side than the tail.

Canada's position is too closely bound up with that of the British Commonwealth and there is little in particular, for her to link herself up with the Pan-American Union, where it is probable that her and our special interests might clash at any moment. Asserting a claim to a special nationality entails no breaking of historic ties any more than that which follows the setting up of separate homes by members of one family.

T. O. F. HIERZER

Manager of the Canada Colonization Association, who has just been appointed Manager also of the Colonization Finance Corporation of Canada, Limited. This announcement follows closely upon the advice issued by the Dominion Mortgage and Investments Association regarding the new plan for settlement of privately owned lands in Western Canada. Mr. Hierzer, acting in a joint capacity with this brings to the new Corporation the settlement experience of the C.C.A., subsidiary of the Canadian Pacific's Department of Colonization and Development.

Arabian Hospitality

Queen Lay In Whose Murderer Can Escape Punishment

Among the Arabs, if a man has murdered another, flees to the dead man's father, and is given the right cup of coffee, his life may be spared. On one occasion, it is related that such an incident took place in Cairo. Friends of the family came in to relate the news to the murdered man's father, and, recognizing the murderer, he refused to accept the demanded vengeance. "No," said the parent of the dead youth, "the man drank coffee here, and I must regard him as a guest."

Wanted A Treat

Mrs. Chatterton: The dentist is only going to take an impression for my new plates. You won't have to go with me. I don't need your help.

Her Husband: But, dearie, I do not want to see you with your mouth full of plaster sitting in silence for ten minutes.

A Lot Of Lumber

The New York Times tells us that the timber used last year in the plants of the Fisher Body Corporation, makers of bodies for all General Motors cars, would have built a city of eight-room frame houses enough to accommodate more than 250,000 people.

"I Am, Sir, A Brother of the Angle,"—Isaak Walton

Hollin Kirby, famous cartoonist of the New York World and twice winner of the Pulitzer prize of \$500 for the best cartoon of the year—was the winner for 1928—is not only a great cartoonist but an ardent fisherman as well, even rivalling Herbert Hoover, President of the United States, in his devotion to angling. No man can lose what he never had, said Isaac Walton, and that's what Kirby tells the fisherman who says he caught the biggest one he's ever had. Kirby has fished in many rivers and lakes of Canada, and declares that no better fishing exists anywhere. His cartoon indicates that the fisherman is happy far from business cares, and that he is having the boys in the office are not sorry such a good time.

Far-famed is the salmon of Nova Scotia, New Brunswick and British Columbia and there are expert guides plenty to care for the angler and show him where the big ones lurk. The Laurentian Mountain region, not far from Montreal, has splendid trout fishing; big "muskie," pike and other fish lure the angler to French River, Ontario, where there is good trout fishing, and the famous Nipigon, on the north shore of Lake Superior, still holds the record for the biggest brook trout ever caught. The 14½ pounder landed by Dr. J. W. Cook, of Fort William, Ont. There are plenty of 6-pounders left which measure more than two feet in length, and a bangalow camp to make visitors comfortable. Every where in the vicinity of Nipigon should try his luck at Devil's Gap Camp, Kanons, on the Lake of the Woods, where there is the best sport, and lake trout, muskellunge and pike.

In the vicinity of Banff, Alberta, famous resort in the Canadian Rockies, there is good trout fishing, and trout, rainbow, steelhead and Dolly Varden trout being popular favorites. Lake Louise, near Banff, has enormous whitefish. Here's the lake in the office—they try, too, go fishing and catch a plenty!

The Herbaceous Border

A Charming Feature Of The Well Kept House Grounds

The well arranged herbaceous border is a charming feature of the well-kept house grounds. If the plants have been well selected, there is assured a continuous flower display from early spring until the autumn woods arrive. The perennial border may be started either by the purchase of plants in the fall or spring of the year, or by raising the plants from seed. The latter is the more economical, and this is the reason of the year when the seeds should be planted for next year's border. In a new bulletin on "Herbaceous Perennials" by Miss Isabella Preston, of the Horticultural Division of the Dominion Experimental Farms, it is recommended to establish the seed bed in a shady position though not under trees. The soil need not be rich, but it is very heavy it is recommended to lighten it with sand. For good germination the surface soil must be made very fine, and the plants should be sown at a width of four feet for the bed and a length limited only by the available garden space and the quantity of plants desired to be grown. This bulletin, which contains a wealth of horticultural information, the result of many years' experience and observation, is now ready for distribution at the Publications Branch of the Department of Agriculture, at Ottawa. The perennial list is a boon for Canadian gardeners in all parts of Canada are enumerated and described and their culture carefully dealt with.

Lime For Poultry

Thirty Million Tons Of Shells To Be Broken From Lumber Yard

Commercialization of thirty million tons of lime shell deposits on the islands of Hamilton, Ont., Labrador, is the object of an expedition, sailed for northern waters, on the steamer "Winona." The shells will be converted into poultry feed. The ship will bring back 30,000 tons for a Portsmouth, N.H. firm, and the venture is backed by St. John's Nfld. business men. Other shipments will be taken to Sorel, Que., it is expected.

Bibles For Royal York

More than 2,000 persons sang lustily in the great convention hall of the Royal York, Toronto, additional hundreds stood outside the hall, and 1,000 were turned away, when 1,400 Bibles were formally presented by international officials of the cadets to the management of the hotel for placing in the rooms.

When neerechaum is first dug from the soil it is soft, like soap.

Describing The Horse

Information As Given Will Be Clear To Driver Of Motor Car

The horse is an automotive animal, consisting of a body mounted on four-brake legs. It has three feet, each with a hoof, the weak, the trot, and the gallop. The intermediate gear is not so popular owing to the vibration. The horse also goes into reverse or stand still in neutral. The engine of the horse is in the centre of the body and the driver sits on the hood. In the rear of the driver is room for a rumble seat, though this is not featured in the more recent models. The horse has a tall but no tail-light, thus distinguishing it from a motor car, which has a tail light but no tail.

It is always well before starting out on your horse to see that he has been fueled and has sufficient water in his radiator. There is no need of worry about oil, as he supplies his own lubrication. The trouble, when it occurs, usually results from defects in the line of motion. When the shoes are at fault, the cause is due to dropping nails rather than picking them. The driver sits with his feet, respectively on the light and left running boards and clutches the steering gear firmly in his hands. When the horse he exerts a firm pressure with his right heel against the body of the horse in the neighborhood of the differential. He steps gradually from the neutral, immediate and to high as the horse picks up speed. If this is done too hurriedly, the horse may stall, an automatically shifting into neutral. The driver must be on his guard against this, as the ordinary horse is not equipped with a windshield and the driver may find himself catapulted over the headlights. Horses may be had in numerous styles to suit every purse and for every varied purpose, with bodies of various attractive tones. Among others is the racing horse, sometimes in a brilliant color, and not infrequently in a dull one. Perhaps the best feature of the horse is that one never thinks of going on his back, as is the case with two of land—Baltimore Sun.

Men Who Succeed

Those Who Have Initiative Coupled With Judgment

Initiative is the masterpiece of business enterprise, when coupled with judgment becomes an irresistible force.

"The world is divided into four classes:

1. The man of initiative, who does without money and honours.
2. The man who does upon being told only once. That man obeys.
3. The man who does after having been told several times. He is not worth his salt.
4. The man who does nothing till he is pounded, and even then fails. Such creatures deserve the contempt that the world always shows them. These they happen to be rich men's sons. Then they have the way made easy for them—but pity the father!

The Road To Popularity

People Who Travel It Must Observe Six Rules

Before you get on the road to popularity, you must have six things packed ready to take with you:— 1. Unselfishness, a willingness to forget self in the interests of others. 2. Steadfast friendliness towards people of all ages. 3. Ability or willingness to adapt oneself to be at ease under various circumstances and with all people. 4. An unassuming manner, not boasting about what you are or have, or can do. 5. A willingness to be needless enclaves and peacemakers. 6. A controlled tongue that refrains from gossip and needless criticism, and speaks in kindness. Truthfulness, so that others know you will keep confidences, and that your word is as good as your bond.

Farm Planning In Alberta

Town planning in Alberta is being extended to include farm planning. The farmer may have a plan drawn up concerning the plans for his house and barns and the lay-out of his farm.

Will Ewe Tyndall Stone

The Federal Government has decided on the use of Tyndall stone in the new Federal Government building at Saskatoon, to cost \$250,000 and the new \$500,000 Federal building in Calgary.

"Ever try a hot water bottle?" "Once! I filled it with water but it didn't heat up at all!"

Western Air Mail

Innovation In The West Praught With Great Possibilities

It is announced from Ottawa that with the awarding of a contract for the Western Canada air mail, the whole business of preparing for the inauguration of an air mail service in this section of the Dominion has been put in hand and that every effort will be made to bring the route into operation at the earliest possible date.

This innovation in the West should have great possibilities, and not only just for the West, but for all Canada. It should add to commercial intercourse between East and West and bring them closer together in a number of ways. It will mean a great saving of time in business mail, and this is important in the business world of today, in which dispatch figures large. It also illustrates further the opportunities for aviation which exist in this far-flung country. Already this science has been of tremendous value in surveying and mapping regions that a few years ago were inaccessible. It seems destined to be one of the great means of transportation for freight and passengers, perhaps making the Atlantic and Pacific coasts little more than a day's journey apart. In a booklet issued by the University of Toronto, Canadians are urged to "turn their eyes to the skies, since the dependence of national development and progress on transportation is more marked than in Canada."

No country has a greater need for aviation than Canada and none with greater opportunities for its success. These facts help to explain its almost spectacular growth. Another factor in the development of "wholesome" aviation which aviation offers to the youth of the land—Regina Leader.

Has Increased In Dignity

French Title "Marshall" Derived From Words Meaning Gross

The title of "marshall," which the French cabinet has decided to abolish on the death of the present holder is an excellent example of a word which has lost its dignity in the course of the centuries.

It derives from a couple of Germanic words, "mar" and "schall," which may be translated "arm" or "servant or groom." In course of time the word "marshall" has become a title of servitude, and a title of servitude acquired a new status regulating tournaments, etc., and presently becoming a kind of master of ceremonies, regulating the order of precedence at feasts and balls, under the title of "maréchal." In the 16th century, the word "marshall" was changed into a "marchal," and "marshall," and the groom had become a commander-in-chief of armies.

Gives Credit To Canada

Dominion Grows Best Wheat Says New Zealand Farmer

Mr. James Lobb, who went from England to New Zealand at an early age and became a very successful farmer, is celebrating his seventieth birthday by making his sixth tour of Canada. He says that his globe-trotting has satisfied him that Canada can beat New Zealand in growing wheat, but not in the production of butter, wool and meat. Mr. Lobb is of the opinion that the inhabitants of Great Britain live and play under better conditions than the people of any other country in the world.

Howell—That's a pretty bad cold you have.

Fowell—It thought it was up to the usual standard.

As some fact one sees it, the only employment worth while is breaking records.

If you wish to please your friends get through talking so they can begin.

"Wouldn't you marry an idiot for the sake of his money?" "Oh, your proposal is so sudden!"—Lustige Kölner Zeitung, Cologne.

Importance Of Tourist Trade As an Economic Factor In Canada Continues To Increase

The importance of the tourist trade as an economic factor in Canada continues to increase and is being recognized to a greater extent than ever by all classes of the community. Fresh interest has been stimulated in the subject by the recent publication of estimates by the Dominion Government placing the expenditures of tourists from other countries in this Dominion at \$250,000,000. It is predicted freely that when the totals for 1929 come to be written up they will be well in excess of the \$250,000,000 mark. The fact, moreover, that the expenditures of tourists from other countries in 1928, while those of Canadian tourists abroad amounted to \$109,215,000, thereby leaving a substantial net balance of trade in satisfaction, but when this worked down to a per capita basis it will be seen that Canadians spend far more in proportion abroad than do foreigners here.

For instance, the figures for the United States alone show that while American tourists spent some \$210,000,000, or about \$240 per capita here, Canadians spent \$75,000,000, or \$750 per capita, across the line. It is evident, therefore, that on a per capita basis we are not getting as large a share of the American tourist trade as we should. This will probably be corrected as the attractions of Canada become better known.

Commenting on the situation, the government statistician says that Canada's great natural assets, her picturesque scenery, the diversity of lake, forest, and river, the many large districts still remaining in their natural state, the healthful and invigorating climate, the character of the Canadian winter and its distinctive sports, the old world lure of French Canada, attract tourists in increasing numbers. The presence on our southern border of the United States, with its dense population possessing in a high degree the leisure and means to travel, the ease of communication between the two countries, the large automobile population, the relative cheapness of an automobile holiday in Canada for the American tourist, all these factors close interlocking of business interests between the two countries result in a very large trade over the border. Canadians, too, are attracted by the larger United States cities with their theatres, museums, etc., and the more "settled" scenery, while large numbers of well-to-do Canadians visit United States winter playgrounds in the south.

That Canadians realize the economic importance of this traffic is evidenced by the large sums spent on highway construction, on wintering, and by the good accommodation provided by hotels, tourist homes and camps. In addition to the direct value of the expenditure of tourists, there follows the wider diffusion of knowledge of Canada's resources and increasing investment in them.

At the same time it is evident that many Canadians do not realize the beauties of their own country. How many people in Ontario, for instance, realize the beauties of the lower St. Lawrence and the Maritime Provinces, where they can enjoy not only entrancing natural scenery but also the salt sea breezes from the Gulf of St. Lawrence or the Atlantic. At the same time the people who live in those regions know little or nothing of the delights of Muskoka or Timagami, or the Georgian Bay, while both are largely ignorant of the pleasure which may be had in the Rockies or at the Pacific coast, or at the pretty resorts in the Prairie Provinces. A greater realization of the beauties of their own country is essential to the tourist trade.

Friend: "You look very serious."
Doctor: "I am worried about one of my patients."
"Is it a very serious case?"
"Yes—he won't pay his bill!"
En. Hoff Half Tins, Goshenburg.

W. N. U. 1793

Grades For Strawberries

Fruit Commissioner Has Worked Out Recommended Grades For Berries

The marketing of all kinds of produce is materially helped when properly graded. The fruit commissioner of the Department of Agriculture, at Ottawa, has offered recommended grades for strawberries. First of all, it is recommended that the fruit be divided into No. 1, No. 1 canning, and No. 2 for jam. The specifications for No. 1 strawberries call for fruit with the calyx and a short stem attached, which are well formed, of good colour, firm, but not over-ripe, free from surface moisture, bruising, black pecks, mould, and from damage caused by insect, diseases or other means. The minimum diameter for this grade is three-quarters of an inch, measured from side to side.

No. 1 canning strawberries are recommended to consist of field run fruit, clean, sound, firm, and of uniform size, of good colour and free from malformed or monkey-faced berries.

The specifications for No. 1 jam strawberries call for field run fruit, clean, ripe, and of good colour, free from malformed or monkey-faced berries. In order to allow for variations incident to careful commercial grading and handling, an allowance of one per cent under the prescribed size and five per cent, by volume may fall below the recommended requirements of the grade.

Farm Relief In Canada

Railroads Are Doing Their Share In Practical Way

Canadian railways had grain at rates that would bankrupt American railroads. From Devil's Lake, N.D., to Duluth, a distance of 384 miles, the rate is 19.5 cents. From Lyndist, Minn., to Fort William, a distance of 388 miles, the rate is 11 cents. The saving is over 20 per cent.

From Estuary, Sask., to Fort William the rate is 24 cents. The distance is 1,426 miles. From Roseman, Minn., to Duluth, the rate is 42 cents. The distance is 1,063 miles. The Canadian railroads are giving their farm customers practical farm relief.

Adopted By All Provinces

The province of Alberta has adopted Old Age Pensions, the funds for which are provided by co-operation between the Federal and Provincial Governments. The scheme has now been adopted by all Canadian provinces westward from the Quebec boundary westward.

Canadians Taking To Air

In 1926 there were 6,000 passengers carried in Canada by air. In 1928 the number was 47,000. Over a quarter of a million miles of territory has been mapped by Canadian airmen.

Kilm burned brick made by the Babylonians 6,000 years ago still exist.

Heads New Organization

Colonization Finance Corporation of Canada Ltd. and Chairman of the Mutual Life Assurance Company, Waterloo, Ontario.

The Colonization Finance Corporation is a new organization consisting of certain large Canadian land-owning companies who have allied themselves with the Colonization Association to assist and expedite sound settlement measures.

According to present arrangements British Columbia will have three show herds, representing three different breeds of dairy cattle on the prairie class "A" fair circuit this year. David Spencer, Ltd., will for the third successive season send a Jersey herd, while the Consolidated Mining and Smelting Company of Trail, will attempt to repeat last year's successes with Ayrshires. British Columbia Guernseys will for the second time be competitors for honors with the herd of Alister Forbes, Cobble Hill, Vancouver Island, and this year will include Regina Fair, which has added Guernsey classifications to its prize list.

British Columbia Show Herds

Three Different Breeds Of Dairy Cattle For Western Fairs

According to present arrangements British Columbia will have three show herds, representing three different breeds of dairy cattle on the prairie class "A" fair circuit this year. David Spencer, Ltd., will for the third successive season send a Jersey herd, while the Consolidated Mining and Smelting Company of Trail, will attempt to repeat last year's successes with Ayrshires. British Columbia Guernseys will for the second time be competitors for honors with the herd of Alister Forbes, Cobble Hill, Vancouver Island, and this year will include Regina Fair, which has added Guernsey classifications to its prize list.

Boys' and Girls' Swine Clubs

C.P.R. Again Offering Four Cups For Competition in Western Provinces

J. M. McKay, general agricultural agent of the Canadian Pacific Railway in Winnipeg, Man., announces the intention of the company to again offer four cups to the Boys' and Girls' Swine Clubs located along the railway's lines in each of the four western provinces. In addition the winning teams in each province will be taken to Toronto, to the Royal Winter Fair as guests of the railway.

It is a popular song he is singing. "It was before he began to sing it."

At the end of the eighteenth century men were using cast iron to build bridges.

God help the middle class. The poor can beg and the rich can steal.

LOTS OF TROUBLE

No. 10, The Mate—485 yards, Par 5.

They've got to be straight to negotiate the tenth hole of the Jasper Park Lodge Golf Course, Jasper National Park, Alberta, over which the Canadian and Western Canada Amateur Championships will be played Aug. 19-24, this summer. Immediately in front of the tee is a water-hole and then it's a case of from bunker to bunker.

The hole from No. 1 (championship) tee is seen at the top and below is the hole in detail with yardages to scale underneath the panel.

Inter-Imperial Trade Idea Meets With Heartiest Response Throughout British Empire

Potatoes Good Feed For Dairy Cattle
Value Nearly Equals Corn Silage Pound For Pound

According to A. E. Perkins, of the Ohio Agricultural Experiment station, potatoes have a feed value nearly equal pound for pound to corn silage. This is useful information as it gives the farmer a market for his culls and any others not finding a market.

The dry-matter content of potatoes is on the average 21 per cent, as compared to 28 per cent for silage. But as the dry matter of the potato is more digestible than that of silage the total amount of digestible ingredients is the same. The dry matter of potatoes is usually about 15 per cent, while that of silage is about 1 per cent, digestible protein.

The big cry against potatoes is that they give an off or potato flavor to the milk. But this is not due to the potatoes that the cows have eaten, but to the potato odor around the stable. Therefore if the cows are not fed until after milking, and care is taken to see that there is no potato odor lingering around the barn during milking, the cream, milk and butter should not be tainted. No ordinary treatment such as pasteurizing will remove the potato flavor from the milk once it is absorbed.

The potatoes are fed raw at the rate of 20 to 30 pounds daily in place of silage. Potatoes must be cut or sliced in order to prevent choking. Care must be taken to see that no green potatoes or potato sprouts are fed as they contain a deadly poison called solanin.

Danger From Lightning

Nine-Tenths Of Casualties Last Year Occur In Rural Districts

The United States Bureau of Standards, which has been making an investigation of the havoc of lightning, has found that 90 per cent of the lightning annually by lightning in the United States and upwards of 1,500 injured, and that nine-tenths of the casualties occur in rural districts. The board has drawn up the following code of measures:

(A)—Do not go out of doors or remain out during thunderstorms unless it is necessary. Stay inside of a building where it is dry, preferably away from fireplaces, stoves and other metal objects.

(B)—If there is any choice of shelter, choose in the following order: 1, large metal or metal-frame buildings; 2, dwellings or other buildings which are protected against lightning; 3, large unprotected buildings; 4, small unprotected buildings.

(C)—If remaining out of doors is unavoidable, keep away from small sheds and shelter if in an exposed location; 2, isolated trees; 3, wire fences; 4, hill tops and wide open spaces.

(D)—Seek shelter in dense woods, a grove of trees, a cave, a depression in the ground, a deep valley of canyons.

A Heavy Load

The star actress of the touring company rushed into the manager's room.

"My jewels," she sobbed. "They're lost or perhaps stolen . . . I can't find them anywhere."

"Which jewels?" asked the manager, curiously.

"The ones I wear in the second act," the actress explained brokenly. "The diamond stars, the emerald bracelet, and the diamond anklets."

"Well, Miss Smith," said the manager, severely, "I hold you responsible for those articles. I'm sorry, but I'll have to dock you seven-and-a-half pence on Friday."

Making a Fisherman's Paradise
Mojave Lake, the largest glacial fed lake in the world, situated in Jasper National Park, Alberta, last year was stocked, as a government experiment, with fingerlings hatched from some 250,000 imported trout eggs. This year the fish are from five to six inches long, are thriving on insects and are quite at home in their new habitation. This spring 250,000 more fingerlings were added to last year's hatch.

At three cents a mile a journey to the sun would cost \$2,790,000.

The Atlantic coast line of the U.S. is 5,560 miles long.

The blood absorbs about two pounds of oxygen daily.

The proposals of James A. Robb, Canadian Finance Minister, in connection with inter-imperial trade and the suggestion of an imperial conference on Empire trade and tariffs continue to be discussed with the liveliest interest throughout the British Empire.

The Times newspaper is appealing to the government to respond heartily to the Canadian suggestion, but there has been no move yet.

The Financial Times, in a long editorial, enthusiastically supports Mr. Robb's ideas.

"Monopolies," continues the Times, "the present provides an excellent opportunity for co-operation in industrial development among the dominions of the Empire, with their magnificent and seemingly boundless resources and unrivaled facilities for the generation of cheap electric power. Canada offers probably the most attractive field in the world today for British capital and enterprise."

The Times calls attention to Canada's development as a manufacturing country and appeals for the co-operation of British labor and capital to assist in this development.

Mr. Robb's proposals have called attention publicly to Canada's important part in the trade of the Empire. It is admitted that the leading railroads extensively advertise the benefits of travel in Canada and Scotland, and that these valuable Canadian would like to see Canadian products advertised by the Dominion government in the same way that Australia, New Zealand and South African products are advertised throughout the country by the respective governments of those countries.

They see no reason why Canadian apples should not have the same publicity as Australian apples, which in the press and on hoardings confront the Englishman at every turn.

Faculty For Languages

Leeds Railway Worker Has Mastered

Mr. Harry Robinson, a Leeds railway worker, is master of twenty-two languages. He can speak English, French, Italian, Russian, German, Spanish, and Danish. He can read and write Greek, Dutch, Persian, Esperanto, Swedish, Portuguese, Bulgarian, Chinese, Hindustani, Arabic, Turkish, Latin, Norwegian, Russian, Serbian, and Japanese. Previous to his war he knew only English and Latin, then he found a French novel a subtle carrying, and mastered it with the aid of a dictionary. All his study has been done in his spare time since then.

Hard Luck Fuses Her

In Birmingham, England, according to "Time," the News Magazine, a Madge Cameron, governess, complained last week that her first fiancé, a war-time officer, was killed by a rifle grenade; her second, an aviator, fell to death three days before the wedding; her third, an engineer, was struck by a crane and died; her fourth died two days before the marriage.

Beat Him To It

The bus was crossing Westminster Bridge.

"Say, conductor," called the American, "what do you call this street here?"

Has the conductor looked over the side.

"Damn it!" he said. "The radiator must have sprung a leak again."

The Bore: "Anything I say gone?"

The Bored: "Well, say your name once or twice!"

"Couldn't be better. My wife has eloped, my mother-in-law is dying, and I have just won the big lottery."

—Montquie, Charolier.

WORLD HAPPENINGS
BRIEFLY TOLD

Mr. Betty Alston, British ambassador to Brazil since 1925, died suddenly in a London hotel, aged 60 years.

Sheep from the famous flocks of His Majesty King George are being imported on Vancouver Island and will be pastured in the Sooke Hills.

Two cargoes of Canadian grain have left Vancouver for Vladivostok. This is the first movement of this commodity to a western Siberian port in years. It is expected that a further cargo will go forward shortly.

London morning papers say the much-talked-of agreement between British and German film groups had been signed with involved capital amounting to approximately 60 million pounds sterling, or \$300,000,000.

Marius Pulton, one of the most noted military test pilots in France, was killed instantly when his plane crashed because of a broken wing. His parachute failed him after the pilot had leaped from the plane.

A cadron of grease, which overturned and ignited in the main hallway of the Hamburg-American liner "Deutschland" furnished a stirring finish to an uneventful Atlantic crossing for 360 passengers.

Expanding trade in the New Westminster area is seen in the recent shipment of a large consignment of rope from the factory at New Westminster and canned milk from the Fraser Valley to the British West Indies market.

A Chinese-British agreement has been signed providing for the training of Chinese naval cadets in Great Britain and to the furnishing to the Chinese government of a British naval mission in development of the Chinese army.

Bulman's Limited, of Vernon, B.C., has started construction of its new dehydrating plant and it is expected that the factory will be completed in time to handle the coming season's crop. Machinery is already moving in.

A shipment of purchased cattle consisting of 25 head of Guernsey cows, purchased in Wisconsin and Illinois, by D. V. Runkle, of Regina, have been placed on the P.N.W. route to Regina, valued at \$10,000.

Has Gained Popularity

Easy Content Teaching Toledo School Children Facts About Canada

A Canadian essay contest in the Toledo, Ohio, schools, sponsored by Edmond G. Odette, M.P., for East Essex, has gained such popularity in that city that one of the newspapers now is carrying a daily feature entitled "Facts About Canada."

"Canada," one of the Toledo papers pointed out, "is a nation of home-owners in the farming district, 78 per cent. of the people owning their own homes."

Other facts listed from day to day, deal with Canada's natural resources, its industrial power, its fishing and its industrial enterprises.

The competition among the Toledo school children was started last fall when Mr. Odette, addressing the North Toledo Imperial club association, offered to pay the expenses of a trip to Ottawa for the author of the best essay on "Canada."

The proposal received such a favorable impression in Toledo, that the chamber of commerce there offered to do likewise for a second student. The object of the essay contest and the trip, is to promote a better understanding between the people of the adjoining countries.

THE SOUNDING FILM.

Producer: "Jump!"
Actor: "But I see no mat!"
Producer: "Of course not. This is a sounding film. We have to reproduce your thud on the pavement!"—
11 420, Florence.

A Pleasing Incident

Deaf and Dumb Children Are Entertained To a Lecture

This pleasing and pathetic little incident took place in Montreal recently—at the largest health exhibit ever shown in Canada, when the Canadian Social Hygiene Council assisted the Montreal Federation of French Health Agencies in a financial drive.

Morning, afternoon, and evening, health lectures were given, thousands of school children being carried free on the street cars. And one day they brought all the little deaf and dumb children in Montreal.

They gathered that silent company in the big lecture hall, and placed them in little groups of fifteen or so, around lay teachers. Each teacher faced the lecturer, and the children solemnly looked at their teachers.

He spoke only a few sentences, and stopped. And all the teachers began to move their fingers, translating the lecture. The children's eyes followed eagerly as they understood the words that were being relayed to them, their own native language they could not understand until it was translated into motion.

Children are notably dignified at lectures, but not so these youngsters. To see how they enjoyed every minute of it was enough to bring tears to many eyes that watched them. They were being brought into closer touch with the world of their voiced playmates; their partial isolation was being temporarily broken down. To each of them, that lecture was a big event.

Recipes For This Week

(By Betty Barclay)

GOLDEN ORANGE FROSTING

Grated rind 1 orange.
3 tablespoons orange juice.
1 teaspoon lemon juice.
Yolk of 1 egg.
Confectioners' sugar.

Mix grated orange rind with fruit juices and let stand 15 minutes. Strain into beaten egg yolks and add enough sifted confectioners' sugar to spread.

HAMBURGER EN CASSEROLE

2 lbs. of round steak ground

2 large onions.

2 large peppers, green or red.

1 large lemon.

1 1/2 lb. of more or bacon according to taste.

Salt and pepper.

Butter your casserole dish or pan and lay about 1 1/2 inches of hamburger in bottom.

1 layer of one onion thinly sliced.

1 layer of one pepper thinly sliced.

Juice of half lemon.

Salt and pepper to taste.

Repeat until the meat is used, making the second layer of meat about one inch thick, this will give enough hamburger left for about 1/2 inch thick on very top. Pour a whole bottle (8 oz.) of catsup over and strips of bacon. Bake slowly or in modern oven for one hour and a quarter.

Early oil wells at Baku were scooped out by hand.

Photograph shows Colonel Charles Lindbergh and his bride, formerly Miss Anne Morrow, daughter of D. W. Morrow, United States ambassador to Mexico, at Mitchell Field, L.I., where they witnessed the test flight in the Daniel Guggenheim safe-aircraft competition. This is their first appearance since their marriage on May 27. Col. Lindbergh is a trustee and consultant of the Daniel Guggenheim Fund for the promotion of aeronautics.—Copyright, 1929, Pacific and Atlantic Photos, Inc.

Out of Their Element

Ekimo Boys Cannot Stand Climate of Eastern Canada

Ben Eill, nine-year-old son of Chief John Eill, head of the Southampton Island Eskimos, and Sam Pudlitt, who have been endeavoring to learn the ways of civilization at Lakefield preparatory school, near Peterboro, Ont., have been forced to give up their studies there and hurry home on account of illness.

Ben and Sam soon became favorites at the Lakefield school where they have been for two years, but just before Christmas both were forced to relinquish their studies to face an ordeal of sickness. Influenza, pneumonia, measles, tonsillitis and operations for mastoids and adenoids proved too grueling a test for little Eskimo constitutions and it has been decided to send them back to their northern home.

Exactly Not

In a small country town they were discussing the question of a brighter Sunday.

Various proposals were put forward, and some daring soul suggested a Pleasant Sunday Afternoon.

A dignified old lady rose in the meeting and said: "There will be no Pleasant Sunday afternoon where I am."

Rush For Homesteads

Homesteads are being filed on at the rate of 100 a week in the Edmonton Land Office.

To Study Oriental Trade

Graduate Of University Of B.C. Has Gone To Japan

Possessor of a \$1,000 scholarship for the study of Oriental North American trade conditions, Howard Nichols, Vancouver, 20-year-old University of British Columbia graduate, sailed recently for Yokohama. The scholarship is the first of three granted for the promotion of knowledge in Canada of Oriental trade by H. R. MacMillan, Vancouver, number one exporter. It provides \$1,000 for one year, free expenses and transportation between Vancouver and the Orient. It is open to all University of British Columbia students who prove themselves in the study of economics.

Hundred Million Sheep

Australia owns 100,000,000 sheep, which, although less than one-seventh of the world's flock, produce annually nearly one-third of the world's wool. It is estimated that 80,000 families in Australia own sheep.

Figure It Out

"Which is the most valuable—a golden sovereign or a 21 note?"

"The note, because when you put it in your pocket, you can double it."

"Quite right. And when you take it out you find it increases."

If the city of Duluth, Minn., were moved to Nevada, the state would nearly double its population.

PREMIER FERGUSON CHRISTENS AEROPLANE

Premier Ferguson, of Ontario, christening the "Imperial," a Cypess Moh plane, presented to the Aviation League of Canada by Imperial Oil Limited, at the opening of the Hamilton Airport recently. The plane is being used by Major-Gen. J. H. MacBrien, C.B., C.M.S., D.S.O., in his travels about the country in the interests of aviation.

SUNDAY SCHOOL LESSON

JULY 14

EZEKIEL TEACHES PERSONAL RESPONSIBILITY

Golden Text: "Each one of us shall give account of himself to God."—Romans 14:12.

Lesson: Ezekiel 18:1-32; 33:1-20.

Devotional Reading: Psalm 125.

Explanations and Comments

The Prophet's Responsibility, verses 7-9.—Ezekiel is set as a watchman upon the house of Israel. He must hear the word of Jehovah and he must proclaim it; for as a watchman he is responsible for warning the people of the consequences of sin. He must know that God punishes wickedness, and he must warn the wicked from his way. If he fails in his duty of warning and the wicked man dies in his iniquity, the prophet is "blood guilty," accountable to God for that man. If, however, the prophet warns the man and the man fails to heed him, the prophet has "delivered his soul," he is free from guilt in the matter. His was the responsibility, not of providing obedience, but of uttering the warning. Recall how Paul declared to the elders of Ephesus that he shrank not from declaring unto them anything that was profitable, and taught them publicly, and from house to house, testifying to Jews and to Greeks repentance to God; wherefore he testified unto them that he was pure from the blood of all men, for he had ceased not to admonish every one night and day with tears. Acts 20:17-31.

One of the first and one of the danger of taking spiritual obligation too lightly. If we are Christ's disciples at all, there is committed to us the "word of reconciliation." We are put in trust with a gospel which is intimately connected with the destinies of men.

It is within our power to speak words which make eternal difference to those who hear them, upon our faithfulness will depend their opportunity of realizing the only way of escape and life. How often are we content with something less than passionate than the service of a true watchman?"—J. Stuart Holden.

Heating By Radio

Centralized Stoves No More Impossible Than Sending Music Around World

While some, perhaps many, of the wonders prophesied for days to come may be far-fetched and folioed on a glib public, all the amazing triumphs of the modern age were once in a similar case. Had anyone foretold the coming of radio not so long ago, ridicule would have been his portion. So the telephone was a miracle in its day, and the type-writer had to fight its way into universal use. Who could have foreseen the place the automobile was destined to occupy from its first examples or induced people to believe that white coal could be harnessed for the service of mankind. Now we are told that radio will bring light and power to our homes and industries and provide heat as well. Centralized stoves instead of central heating plants are no more impossible than sending music around the world without visible agency.

Just one stove for the entire city and that raised 1,000 feet in the air, is the possibility announced by Paris, France. The scheme entails the establishment of wireless energy to be sent from the top of the Eiffel Tower. In each house there would be set up a machine, like, yet unlike a radio, that would intercept the waves, transform them into heat and become a radiator to warm the rooms. The proposed waves would be of 400 to 600 volts and reach two to three meters' length. All that is needed is to place on the receiving posts a filament that the wireless flow will raise to incandescence, and you will have your stove unit. Given enough such filament units and you have your heating or cooking stove minus coal, oil, or gas or wired electricity.

Sale Of School Lands

Great Interest Shown In This Year's Auction Sales Held In West

Unprecedented interest was manifested in this year's auction sales of reserve school lands in Saskatchewan and Alberta. Attendance at the various points where sales were held was high and reached 1,000 at some points. Many farmers acquired additional land adjoining their present holdings for the purpose of extending their operations or to make provision for their sons. Many of the buyers of these lands were "new Canadians" who have prospered in western Canada.

In all, some 338,000 acres of land were sold, for a total of \$10,192,829. Prices paid ranged all the way from \$8 to \$70 an acre. In Saskatchewan, 4,602 parcels were sold, the average price being \$11.33 per acre. Two of the heaviest sales were at Assiniboia, Sask., where \$1,400,000 was realized, and at Roseburg, Sask., where \$1,210,000.00 was taken.

Grandmother Says

"That when she was a wee, tiny baby and her mamma did not have enough milk to nurse her, she gave her Eagle Brand Milk, which made her strong and healthy—and now my mamma is giving me Eagle Brand, and I have grown over half a pound a week since I was three months old."

The high quality, uniformity and economy of Eagle Brand makes it the first choice for cooking and table use.

And your baby is not gaining in weight as it should—if it cries or is fretful or restless—something must be the matter with it.

In this paper from time to time you will find an advertisement of Eagle Brand Milk, a food that has raised more healthy babies than all the prepared infant foods combined. Cut out the advertisement and mail it to The Borden Company, Limited, 140 St. Paul St., West, Montreal, and they will send you, free of charge, a very helpful baby welfare book containing authoritative feeding directions and a vast amount of useful information on the care of baby. Also ask for Baby Record, a diary of baby's progress.

About Town and Country

A concrete sidewalk, completing the west side of the first block in Main Street, has just been finished by Contractor Langmuir.

Further concrete sidewalk work is contemplated by the council including the completion of the second block of Main Street.

Mr. and Mrs. R. E. Gillespie left last Sunday for Calgary. For some days Mr. Gillespie has been in very poor health and the present trip to the city is made so that he may undergo X-ray examination.

The Misses Laura and Melva Walker arrived in Oyen last Friday to visit their parents Mr. and Mrs. W. T. A. Walker. Miss Laura Walker motored from New York to Toronto where she was joined by her sister, and then continued her journey west to their home in Oyen.

Born—To Mr. and Mrs. F. E. Neid of Oyen, at Oyen Hospital, on Tuesday, July 9, a son.

Mr. and Mrs. J. D. Hotherington and daughter who have been visiting at the home of Mr. and Mrs. W. T. A. Walker, left last Sunday for Banff, where they will spend a vacation.

Mr. and Mrs. J. C. Hyde and family spent last week at Turtle Lake, Sask., (north-east of Lashburn) camping and fishing, and report a most enjoyable outing.

Mr. C. V. C. Cass, accountant at the Bank of Toronto at Oyen branch, who has been doing relief work at Coronation, returned to Oyen last week.

Mrs. M. G. Whitlock left last Wednesday for Vulcan, Alta., to visit relatives.

Jean and Beth Whitlock left last Wednesday to attend the Girls' Camp at Drumheller.

Mrs. H. C. Swartzlander, Sr. and her grandson Frank, arrived in Oyen last Monday from Calgary.

The News extends congratulations to the High River Times for winning the trophy for the best newspaper in a Canadian town 1500 population or under.

Mr. John P. Borabek, left for Calgary last Sunday on a business trip, returning to Oyen this morning. While in the city he attended a meeting of the Hail Board.

Mr. and Mrs. Thos. Lees Christina and Tommy left last Sunday to attend the Stampede and spend a holiday in Banff.

Miss Gertrude Charbonneau arrived in Oyen from Saskatoon, last Monday, and later in the day left for her home in Monitor.

Mrs. J. Sherrett and son of Calgary, who have been visiting Mr. and Mrs. Robert Nisbet, returned to the city last Sunday.

Mr. and Mrs. G. A. Gosselin and daughter Mary left yesterday morning for Waterton Lakes, where they will spend a holiday.

Mr. Lorne McQuarrie, left last Saturday for Calgary.

Mr. and Mrs. H. E. Bradford and family left last Sunday to spend a short vacation in Saskatchewan and district.

Alex. R. McTavish, R.O. Sight Specialist of Drumheller, will make his regular monthly visit to the Hotel, Oyen, Thursday, July 18. Eyes tested, and glasses fitted. Dependable eye-sight service at very reasonable prices.

Full Gospel, Hear Evans, F. J. School in the Masonic Hall Oyen, each Sunday evening at 8 o'clock, commencing July 7. Subject next Sunday "Our Redeemer".

Mr. and Mrs. James Lees and family and Mr. and Mrs. Robert McCullum, were week end visitors in Rosetown.

Mr. Robert Campbell, secretary of the Fuego Oil Co., left this morning on a business trip to Calgary.

Showers during the latter part of last week have helped the situation for a few days, but a real soaking rain is needed to bring along what crop is left. Garden stuffs have shown improvement after last week's showers, but they too, need a real rain.

Tenders for the proposed new United Church, are to be in not later than noon, July 15.

LOST—Between Oyen and Benton corner, tire rim flange. W. V. Miller, Oyen.

Smoking forests or smoking chimneys—WHICH?

WE CAN'T HAVE BOTH

Over one-half of all Canada's industries depend on wood as a raw material. When the forests are destroyed mills must close down, railway earnings must suffer, trade must stagnate and prosperity must vanish.

Issued by authority of
Honourable Charles Stewart,
Minister of the Interior.

Its big car power is under instant, easy control

NOT only is Pontiac a BIG Six, with the power which you would expect a Big Six to possess, but this power is always under the immediate and easy control of the driver. Touch the accelerator and the great surge of power from Pontiac's Big dynamically-balanced Six-cylinder engine... developed by the famous GMH high-compression head... whisks you out in front of the traffic line. Touch the brake pedal... and instantly Pontiac's big, internal-expanding, protected brakes bring you to a smooth, silent stop. Take a trial ride in Pontiac and discover for yourself that Big Six quality, beauty and performance have definitely entered the low-priced field.

IT'S BETTER BECAUSE IT'S CANADIAN

Riding on the Roof of the Rockies

SHADOW LAKE UNDER THE SHADOW OF MT. DALL
Among the most spectacular of the Trail Rides ever attempted in the Canadian Rockies will be the one proposed to start August 8 and lasting 18 days to take in a long distance ride to the Columbia Icefield from Lake Louise. This icefield is the largest body of glacial ice left on the North American continent covering 150 square miles and surrounded by peaks from ten to twelve thousand feet in height. The ride will be from Lake Louise up the Bow Valley to Snow Lake, over Bow Pass and by the Mistaya Valley past Waterfall Lake to the North Saskatchewan River, then up the Alexandra River Valley to Castlehead and the Columbia Icefield. Only Trail Riders holding at least the silver button, emblematic of completion of 100 miles of trail riding, will be permitted to join the expedition, since all taking part must satisfy the committee that they will not prove a burden to the rest of the party. For less experienced Trail Riders, or those who cannot spare the time, there will be a four-day ride starting from Banff August 1 and ending at Castle Mountain Bungalow Camp. It will take in the Egypt Lake district, which will be accessible for the first time this summer, so that those participating in this ride may regard themselves as pioneers. Beautiful Shadow Lake under Mount Hall will be the camp site of the riders on the second day out and, in all, seven glacier-fed lakes will be on the route of the trip.
